

Naval Architect

Are you a Naval Architect looking for a new challenge? If you are looking for a broad technical job at an innovative company focusing on new and sustainable technologies, keep on reading! Future Proof Shipping B.V. in Rotterdam is looking for you!

Job description

As Naval Architect you will work in a small multidisciplinary team, working on challenging sustainable shipping solutions. You will be responsible for all Naval Architecture related work of the design.

Specific duties in this role include:

- Working on feasibility and workability studies.
- Working in engineering and design, preparing drawings from concept design until production drawings.
- Performing Naval Architecture calculations, from stability booklets up to light weight checks.
- Checking diagrams, construction plans, specifications and reports.
- Performing and checking of strength analyses.
- Maintaining contact with 3rd parties involved in the project (shipyards, subcontractors or classification societies).
- Support project management, production and operations departments.
- Make proposals for technical improvements.

Who we are looking for:

We are looking for a Naval Architect with at least 3 years of experience in a similar job position. Furthermore, you meet the following requirements:

- BSc / MSc Degree in Naval Architecture or similar.
- Knowledge of Naval Architecture software such as SolidWorks, AutoCAD, Rhinoceros, Ansys, etc
- English (verbal & written). Dutch would be an advantage.
- We prefer candidates living in the Netherlands, but we consider EU citizens as well if you have the willingness to relocate to the Netherlands for the long term.

What we offer:

A very interesting job in a small, dedicated team with an open, modern working environment and short communication lines. Possibilities to grow in responsibilities and personal development. Working with interesting High-tech products. A fun team that wants to learn and grow.

Where you will work:

Future Proof Shipping B.V. (FPS) (www.futureproofshipping.com), offers zero-emissions shipping services to enable players across the value chain make the transition to zero-emissions. As a zero-emissions vessel owner, FPS aims to build and operate a fleet of 30 zero-emission inland and short-sea vessels over the next seven years which they will offer for charter to logistics service providers and cargo owners. FPS also facilitates other shipowners and stakeholders in the maritime sector who are ready to make the shift to zero-emissions, through technical support as well as project development and management.

In 2022/2023, FPS retrofitted its first inland vessel, FPS Maas, to sail on hydrogen fuel cells to transport container cargo between The Netherlands and Belgium.
