

# Automation Engineer Shipbuilding

*Are you an Automation Engineer with experience in the shipbuilding industry? If you are looking for a broad technical job, focusing on new and sustainable technologies, keep on reading! We are Future Proof Shipping based in Rotterdam and we are looking for you!*

## Job description:

As Automation Engineer you will work in a small, multidisciplinary team, working on sustainable shipping solutions. You will be responsible for the design, construction and testing of software for ship automation systems in combination with data analytics.

## Specific duties in this role include:

- Design and implementing automation solution;
- Data analytics and visualization;
- Providing technical support where necessary;
- Determining purchase specifications;
- Support Project Management, production and operations departments;
- The point of contact and source of information regarding Automation.

## Who we are looking for:

We are looking for an Automation Engineer with at least 3 years of experience in design and installation of automation systems preferably in shipbuilding or offshore. Furthermore, you meet the following requirements:

- Critical thinking and problem solving approach;
- BSc / MSc degree Electrical Engineering or similar engineering;
- Experience in Automation Engineering, testing and commissioning (HMI's, PLC, SCADA);
- Experience in Engineering software (Matlab, Python and similar);
- Experience with development and integration of IoT solutions is preferred;
- Drive for sustainability;
- English in word and writing, Dutch would be an advantage;
- We prefer candidates living in the Netherlands but we consider EU citizens as well if you have the willingness to relocate to the Netherlands for the long term.

## What we offer:

A very interesting job in a small dedicated team with an open, modern working environment and short communication lines. Possibilities to grow in responsibilities and personal development. Working with High-tech products. A fun team that wants to learn and grow.

## Where you will work:

Future Proof Shipping B.V. (FPS) ([www.futureproofshipping.com](http://www.futureproofshipping.com)), offers unique zero-emissions shipping services to enable players across the value chain make the transition to zero-emissions. As a zero-emissions vessel owner, FPS operates a fleet of zero-emission vessels and aims to enlarge the fleet. FPS also facilitates other shipowners and stakeholders in the maritime sector who are ready to make the shift to zero-emissions, through technical support as well as project development and management.
